LEASING POLICY for NEW BRIDGER DATS

We will lease new DATS II or III type equipment with a price basis of our standard selling price for the equipment at the time of sale (currently \$ 7313 for DATS II, \$ 9500 for DATS III domestically).

The minimum leasing term is 6 months, and the minimum monthly billing is 1/12 of the price basis ( $\$7313/12 = \$610/\text{month}$ ,  $\$9500/12 = \$792/\text{month}$ ).

The equipment can be leased to own, or purchased outright at anytime during the leasing period. Sixty percent of the lease payment is credited against the outright purchase price each month.

Normal delivery of equipment to the customer is 6 weeks from receipt of order. Expedite charges may apply for faster service.

Warranty coverage is extended for the duration of the leasing period. Upon purchase of the equipment by the customer, the standard warranty applies (normally 1 year, parts and materials).

Sample calculation of lease or purchase:

Purchase price or lease basis for new DATS 3 = \$ 9500.00

Sample transaction for DATS 3 unit purchased after 6 months:

6 month lease @ 792/month	\$ 4752.00*
60% applied to purchase	\$ 2851.00
original price basis	\$ 9500.00
buyout price, @ 6 months	\$ 6649.00

Return of equipment for credit at the end of a leasing period assumes normal wear and tear from operations in a protected environment. Unusual or severe damage will be charged to the customer. The customer may retain the heat exchanger tube at the expiration of the lease period.

\* plus shipping charges and tube configuration charge of \$150.00
